**GoRNA**  
STRUCTURAL BIOLOGY GROUP

# TECHNICIAN JOBS

We are looking for **TWO RESEARCH TECHNICIANS** for SONATA and LIDER projects to join the Structural Biology Group of Dr Maria Górna at the University of Warsaw

This is an opportunity to join a young dynamic team in an interdisciplinary research unit (CNBCh UW), equipped in state-of-the-art equipment for expression, purification, high-throughput crystallization and biophysical characterization of proteins and their complexes (<https://gorna.uw.edu.pl>).

We are looking for **MOTIVATED RESEARCH TECHNICIANS / ASSISTANTS** with the following:

- Good knowledge of molecular biology;
- Good study records or relevant work experience;
- Good spoken and written English;
- Experience in mammalian cell culture, protein purification or working with RNA will be considered an advantage.

Tasks will include **help in research projects** (cloning, cell culture, protein purification) as well as **ordering and maintenance of laboratory reagents**. Alternatively, responsibilities and roles in one of the positions (LIDER) can be expanded to suit a **junior postdoctoral fellow**.

Applications should be sent to [recruit.gorna@gmail.com](mailto:recruit.gorna@gmail.com) including the following information:

- **Motivation letter;**
- **Letters of recommendation (preferably)** or e-mail contact details for at least 1 referee;
- **CV with a list of achievements**, such as: grade average from the studies (for recent graduates), publications (if applicable), awards, studentships, major conference presentations, internships and any other relevant information.

Applications will be accepted till **June 15<sup>th</sup> or until the position is filled.**

The positions are **available immediately** until **September 2018** (SONATA) or **May 2018** (LIDER).
