

FORM FOR EMPLOYERS

INSTITUTION AGH University of Science and Technology, Academic Centre of Materials and Nanotechnology

CITY Kraków

POSITION ordinary professor

DISCIPLINE chemistry/physics

POSTED

EXPIRES 22.12.2017

WEBSITE

KEY WORDS: nanotechnology, chemistry and physics of materials, nanoscale phenomena

DESCRIPTION (field, expectations, comments):

- title of professor of chemistry/physics,
- research experience in the field of nanotechnology and chemistry/physics of nanomaterials, publications in widely recognized international journals,
- significant increase in academic achievements after obtained title of professor of chemistry/physics,
- knowledge of experimental techniques used in material research, including electrochemistry and spectroscopy,
- involvement in interdisciplinary research activities encompassing chemistry, biochemistry, and solid state physics, confirmed with appropriate research papers,
- experience in analytical and synthetic research activities, confirmed by widely recognized review papers in international journals,
- experience in leading research projects in chemistry, physics and materials science of both fundamental and applied profile, participation in international research groups,
- leadership of research groups,
- experience in grant applications on national and international level.
