KEY WORDS

Building Automation, Internet of Things IoT, Smart Homes

DESCRIPTION (field, expectations, comments):

The candidate will work in a team involved in industrial automation particularly advanced building automation BMS, is expected to work in teams.

Requirements which the candidate should meet:

- PhD degree in electrical engineering,
- Knowledge of building automation and control standards (especially LonWorks technology).
- Knowledge of LabView.
- Ability to use Internet of Things technology for improving the energy efficiency of buildings.
- Documented scientific achievements confirming knowledge of issues related to building automation systems.
- Participation in research projects.
- Industrial engineering practice.
- Predispositions for scientific and didactic work.
- Completed pedagogical training.
- Participation in conferences and symposia.
- English language at B2 level.
