KEY WORDS: RESEARCH ASSISTANT, PHYSICS

DESCRIPTION (field, expectations, comments, requirements):

The Faculty of Physics and Applied Computer Science at AGH University of Science and Technology in Krakow, Poland has an opening for a research assistant position in the Department of Particle Interactions and Detection Techniques. The selected candidate is expected to join a project on development of an innovative compact neutron spectrometer based on technology of GEM detectors. The goal of the project is to develop a compact neutron spectrometer for monitoring plasma parameters in the fusion reactor ITER.

The project is a part of the EUROfusion program (Enabling Research Projects). The group from the Department of Particle interactions and Detection Techniques, in collaboration with the Institute of Nuclear Physics, Polish Academy of Sciences, develops a concept of neutron spectrometer for the future ITER reactor. The goal of the current 3-years stage are to design and construct of a demonstrator detector and validate the concept with measurement using neutrons from a neutron generator.

Requirements:

- higher education in physics or technical physics,
- MSc degree in physics,
- participation in the PHD program and open doctoral thesis,
- experience in the area of physics and technology of gaseous detectors, in particular detectors based of GEM technologies,
- experience in designing and operating electronic readout systems of position sensitive detectors based of Application Specific Integrated Circuits,
- certificate B2 or equivalent.
