

Assistant professor in Institute of Organic Chemistry of the Lodz University of Technology

Lodz University of Technology is one of the finest universities of technology in Poland. Its tradition and experience in training professionals and conducting research date back more than 75 years. It is an attractive partner for business. It cooperates with the largest national and international corporations. It conducts research of a European standard, develops new technologies and creates innovation in collaboration with the leading research centres all over the world. One of the pillars of Lodz University of Technology management is equal treatment of staff regardless of their gender, age, race or other demographic and social characteristics. In 2016, TUL was the first technical university in Poland to receive the HR EXCELLENCE IN RESEARCH award certifying that the University adheres to the principles of *the European Charter for Researchers* and *the Code of Conduct for the Recruitment of Researchers*.

8. Description of the employing unit

Institute of Organic Chemistry is one of the units of Chemical Department of the Lodz University of Technology. Was created in 1970 as a result of changes provided by Ministry of Science and Higher Education. The Institute is a scientific unit conducting research in the field of organic chemistry. The main lines of research concern the methodology of organic synthesis, asymmetric catalysis, synthesis and the use of organic catalysts with a strictly defined spatial structure. The important aspect of our research is understanding the mechanisms of organocatalytic reactions based on kinetic and synthetic techniques, particularly with nuclear magnetic resonance spectroscopy (NMR). Recently we also conducting research on mass spectrometer coupled with multidiversion liquid chromatograph. The Institute's research work is focused on practical use in industry and medicine. We also run many projects, foreign and national.
