KEY WORDS: RESEARCH ASSISTANT PROFESSOR; PHYSICS, CHEMISTRY

DESCRIPTION (field, expectations, comments, requirements):

We are looking for a full-time associate professor to be employed at the Department of Medical Physics and Biophysics. The person employed on this position will act as the supervisor in a project focused on design and application of the spectroscopic and microscopic methodologies to nano-probing, modeling and recognition of the interactions between cells at the molecular level. The multimodal approach involves the use of a combination of Fourier transform infrared spectroscopy (FTIR), in particular nanoscale infrared spectroscopy (nano-IR) and Raman spectroscopy (RS) in combination with other spectroscopic and microscopic techniques as well as traditional reference techniques. The basic duties of the employed person will include co-ordination of research team, participation in the design of experiments, support or/and carry out advance spectroscopic measurements, consultation on a scientific level, controlling laboratory supplies purchases and equipment, hiring procedures to the project, supervision of PhD students hired in the project, comprehensive data analysis and publication of the results, reports, results and the presentation of the project results on the international level.

The position will be for 33 months with the nominal starting date of 01.07.2023.

Requirements:

- 1) postdoctoral degree in physical sciences, chemical sciences or a related discipline
- 2) documented experience in the application of vibrational spectroscopy techniques in the study of biological materials, including studies at the cellular level
- 3) experience in managing research teams or conducting R&D works
- 4) experience in obtaining and implementing research grants
- 5) experience in educating research staff (supervisor/assistant supervisor of PhD thesis)
- 6) completed scientific internships in foreign institutions
